

WHERE INGENUITY MEETS ENGINEERING

Automation services

Want to reach **no-operator automation** level?

Over 10 years of experience in industrial automation with **software development focus and AI implementation.**

No operator level automation:

- Process data collection (PLC, HMI)
- Local or cloud database/server
- AI model training for specific applications
- Data acquisition and control outputs
- AI models continuous improvement
- Advanced motion control (Robots, VFD)

Industrial software development

- Custom software
- Web apps
- Mobile apps

IoT systems integration

- Monitoring systems
- Predictive maintenance
- OEE

AI Vision Systems

- Adaptive inspection systems
- Traceability

We focus on **next level automation**,
using **AI powered tools and models** to give
our customers superior process control.

Industries:

- Food and beverage
- Chemical
- Advanced Materials
- Pharmaceutical
- Metal mechanic
